Experience

John Deere, Software Engineer

January 2023 – Present

Customer Crew

- Supporting two customer portals for ~50k customers to apply for credit and make payments
- Implemented system for customers to register bank accounts by scanning checks
- Created MCP server to serve 1000+ documents as additional context for GitHub Copilot internally
- Collaborating with multiple teams to integrate SMS notifications while maintaining legal compliance

Cloudbunga

- Maintained Jenkins CI/CD infrastructure and assisted with cost optimization within the company
- Led migration of team's websites from deprecated libraries to modern libraries and frameworks
- Created observability pages to provide infrastructure health monitoring of 200+ AWS accounts
- Developed dashboards to visualize and track ~1M Jenkins deployments and ~3M custom steps
- Implemented AI chatbot to remind and assist teams with updating AWS infrastructure

Onecloud

- Managed and deployed foundational AWS and Azure infrastructure throughout the company
- Contributed to removal of ~170k vulnerabilities with automation to migrate DNS servers to Route53
- Achieved a projected ~\$1M in annual cost savings with consolidation of networking infrastructure
- Automated the deletion of VPC's and associated infrastructure to increase support efficiency
- Mentored 5 part-time students on development best practices and upskilling in cloud environments

Projects

LoL Player Challenge Analytics Platform

- Designed data pipeline built in AWS (S3, Lambda, Athena) to process data from ~30k players
- Implemented z-score normalization and composite skill scoring to identify outliers using Athena

Portfolio Website, jaredhayashi.com

- Created using React and deployed to Cloudfront using Terraform and GitHub Actions
- Utilizes Cloudwatch alarms with a lambda kill switch to protect against potential spam

Skills

- **Languages:** Typescript, Javascript, Python, Java, Kotlin, HTML, CSS, SQL
- **Technologies:** AWS, Terraform, DynamoDB, PostgreSQL, Docker, GitHub Actions, Jenkins
- **Frameworks:** NodeJS, React, Playwright, Cypress, Vitest, Jest, Redux, GraphQL

Education

Iowa State University, Ames, IA

August 2019 – December 2022

Bachelor of Science, Software Engineering
